Four-Year Graduation Plan - Courses and Critical Benchmarks

The following is a sample course of study. It is the Student’s responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement. All incoming freshmen must develop an academic plan (which maps out all courses needed to graduate within your intended major/degree). Your academic advisor is available to meet with you and create your specific plan.

Your path to graduation may vary slightly based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning and placement in Mathematics. You are responsible for checking prerequisites to any courses. Critical Courses and minimum recommended grades (as noted below) provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Pre-Health is a curricular designation, not a degree program. Students must declare a major and should refer to the Major Map that is linked to that degree program.

### Fall Semester Year 1: 15-17 hours

Complete 15 term hours toward degree (recommended), 12 minimum (required)

The ALEKS Math Placement Exam is required prior to enrollment in MATH 110 and some 200-level MATH/STATS courses.

The MATH/STAT course should be chosen based on the requirements of the professional schools to which they plan to apply.

CHEM 211L fulfills CAS Laboratory Experience Requirement.
