

Four-Year Graduation Plan - Courses and Critical Benchmarks

The following is a sample course of study. It is the Student's responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement. **All incoming freshmen must develop an academic plan (which maps out all courses needed to graduate within your intended major/degree). Your academic advisor is available to meet with you and create your specific plan.**

Your path to graduation may vary slightly based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning and placement in Mathematics. You are responsible for checking prerequisites to any courses. Critical Courses and minimum recommended grades (as noted below) provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Career Planning

Urban Planning is a profession that improves the welfare of people and their communities by creating more livable places for present and future generations. Our four year studio-based Urban Planning program trains students to be innovative planning professionals with an emphasis on urban design. Students study the physical form of urban space, human movement through space and the dynamic forces that produce the places in which we live. Also, students are engaged in communities and gain hand-on experience to prepare their professional careers in Urban Planning through studio projects. UMKC is located at the heart of the metro area, just walking distance from the world renowned Country Club Plaza. Our location provides immediate access to an urban laboratory for the study of issues that are common to cities throughout the nation. The Urban Planning faculty at UMKC includes scholars who conduct original research as well as engaged professionals who work on many of the most pressing issues in the field.

Graduates with a BA in Urban Planning + Design from UMKC have a portfolio of projects as well as a professional internship experience that make them highly competitive for entry level urban planning jobs in the public, private and non-profit sectors. Graduates of our program work in urban planning, public policy, community development, graphic design and urban design positions in Kansas City and in major metropolitan areas across the country. More information about careers in urban planning may be found on the American Planning Association's website at www.planning.org.
